LA-4 demo guide

Book of Business on the demo agency “Advance Team (QA demo)”, Thursday Oct 9, 2026. Every screenshot and figure in this guide was taken from the demo agency’s own screens this morning.

THE STORY IN ONE BREATH

LA-4 turns the files carriers send into a book of business the agency can trust. Every policy is read from the carrier’s own file, every commission dollar is checked against what the contract says it should be, and every figure can be clicked back to the exact line of the file it came from.

BEFORE YOU START

- Open `http://localhost:3000` and sign in as the demo owner (Demo Agent).
- Sign in to staff (`/admin`) in a second window with your own account.
- Open the tabs in running order. Add `?source=carrier` to Policies, Commission ledger and Discrepancies.
- Have File Explorer open at `docs\la4\demo\sample-files\`.

THE ONE FILE YOU UPLOAD, AT STEP 10, ONCE

```
docs\la4\demo\sample-files\LA14-policies-2026-10-09.csv
```

- Today’s LA14 file with one change: DEMO-1006 has paid (paid-to Oct 1 → Nov 1).
- Dry-run passed: not a duplicate, 8 policies, no findings, one change.
- Don’t upload it before the demo.

LOOKS ODD ON SCREEN, BUT ISN’T

- **Discrepancies badge 17**, list shows 2: the badge counts old hand-entered items.
- **Ledger “Lines 152”**, list shows 10: same reason.
- **“10 statement lines are waiting”**: the old hand-import path.
- **Two payments on Oct 5** on DEMO-1002: a file, then its correction. Both are kept.

RUNNING ORDER

01 Files come in
02 Reading carrier files
03 Import your book
04 Policies and history
05 Follow a number down
06 Commission ledger
07 Rate card
08 Discrepancies
09 Lapse risk
10 The live moment
11 Book scorecards
12 Settings that drive it

01 Files come in

LA-4.1 doors · 4.2 raw layer · 4.19 runs

`/app/carrier-files`

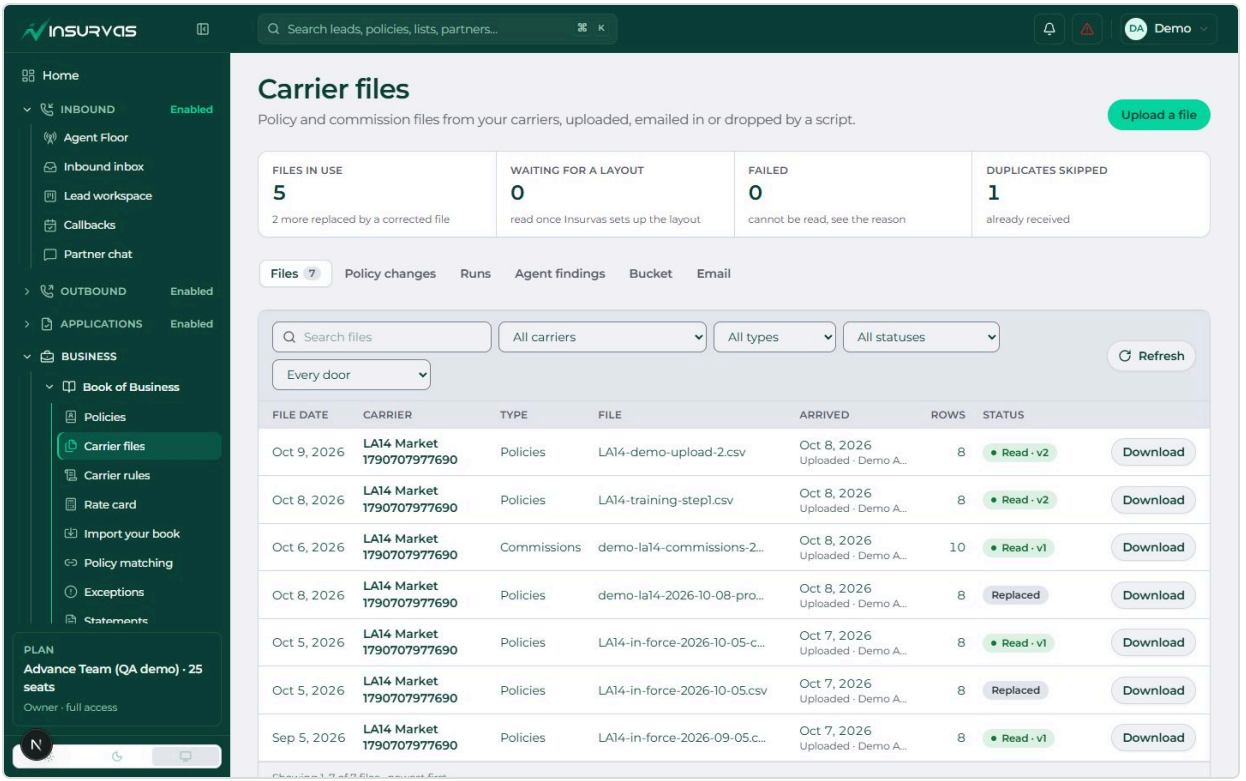

DO

1. Open **Carrier files**. Read the four tiles.
2. Point at the filters: carrier, type, status, how it arrived.
3. Click the **Email** tab, then **Bucket**: the other two doors. Don't press **Create address** unless you want the demo agency to get a permanent email-in address.
4. Click **Runs**, then a run's time to open its stages.

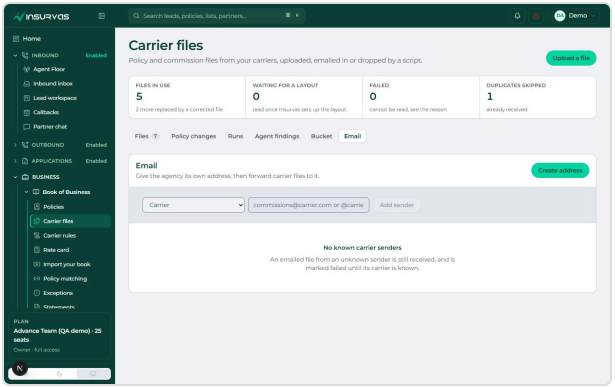

YOU'LL SEE

Files in use	5
Replaced by a corrected file	2
Failed	0
Duplicates skipped	1

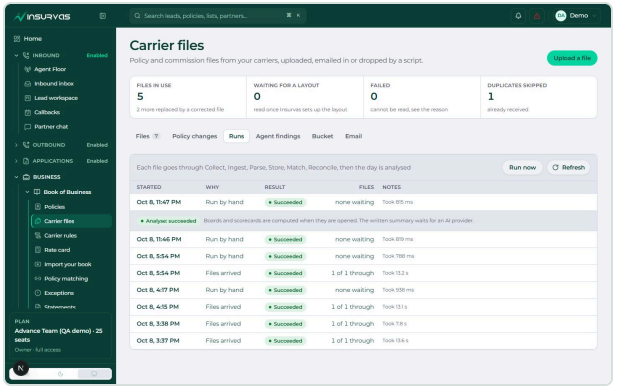

> *Files arrive three ways: upload, email to the agency's own address, or a folder per carrier and date that a script fills. A duplicate is recognised by its contents and skipped. A corrected file replaces the day's file, and the old one is kept. Nothing is ever changed.*

Carrier files: the tiles, the tabs and the seven LA14 files.

Email: the agency's own address and known senders.

Runs: every run, stage by stage.

02 Reading carrier files

LA-4.3 layouts · 4.4 PDF statements · 4.5 status words · staff window

`/admin/layout-maps`

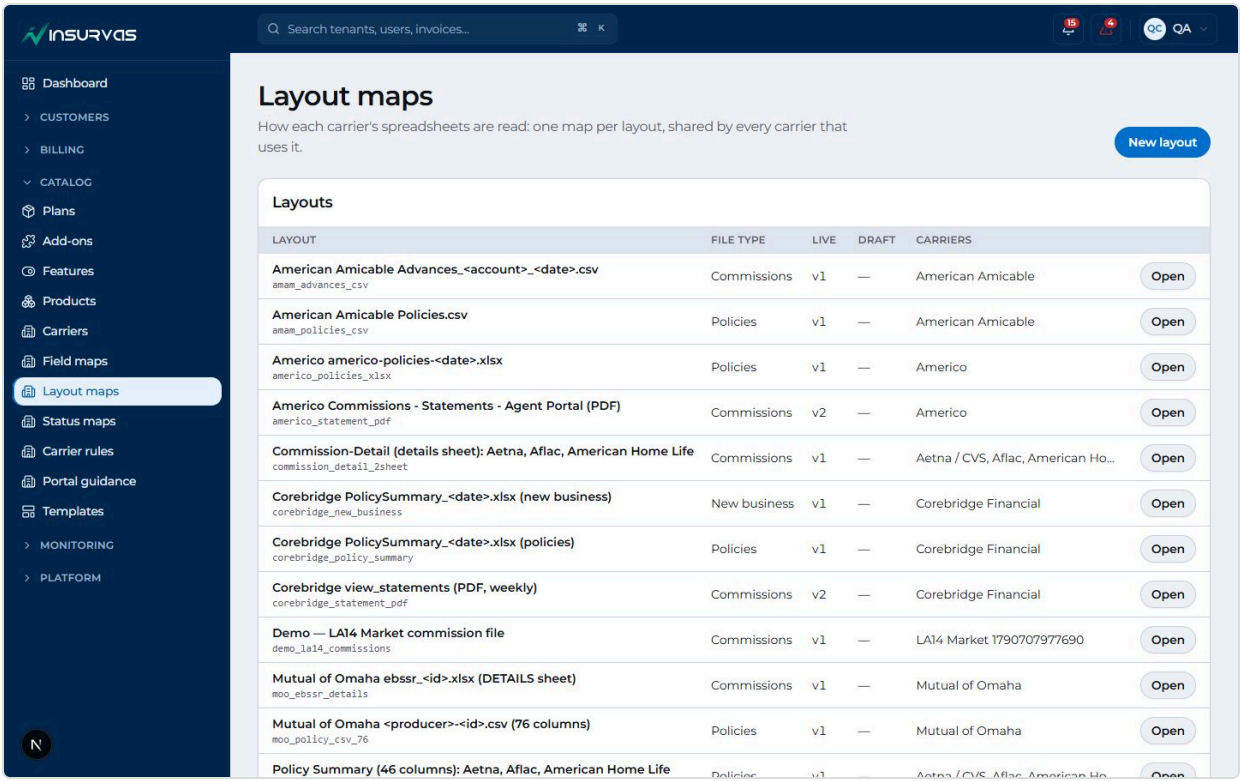

DO

1. In the staff window, open **Layout maps**: one layout per carrier format, with its live version.
2. Scroll to **Carrier assignments**: which layout reads each carrier's files.
3. Open **Status maps**: each carrier's status words mapped to the nine statuses.

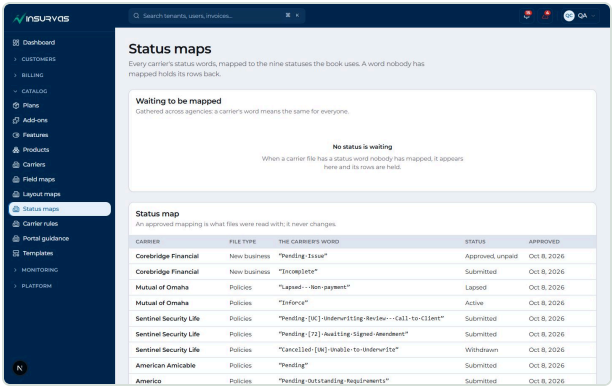

YOU'LL SEE

Published layouts	**14**
Carriers covered	**8**
PDF statements	**Americo · Corebridge · SSL**

> *We set a carrier's format up once and every agency gets it. A PDF statement whose lines don't add up to its own total is refused, and nothing reaches the ledger. In testing, the sample Corebridge statement was $247.30 short and was refused; the corrected copy was read. A person approves each carrier's status words once. Nothing is guessed.*

Staff › Layout maps: the live version of each carrier layout.

Staff › Status maps.

03 Import your book

LA-4.10 existing book import

`/app/book-import`

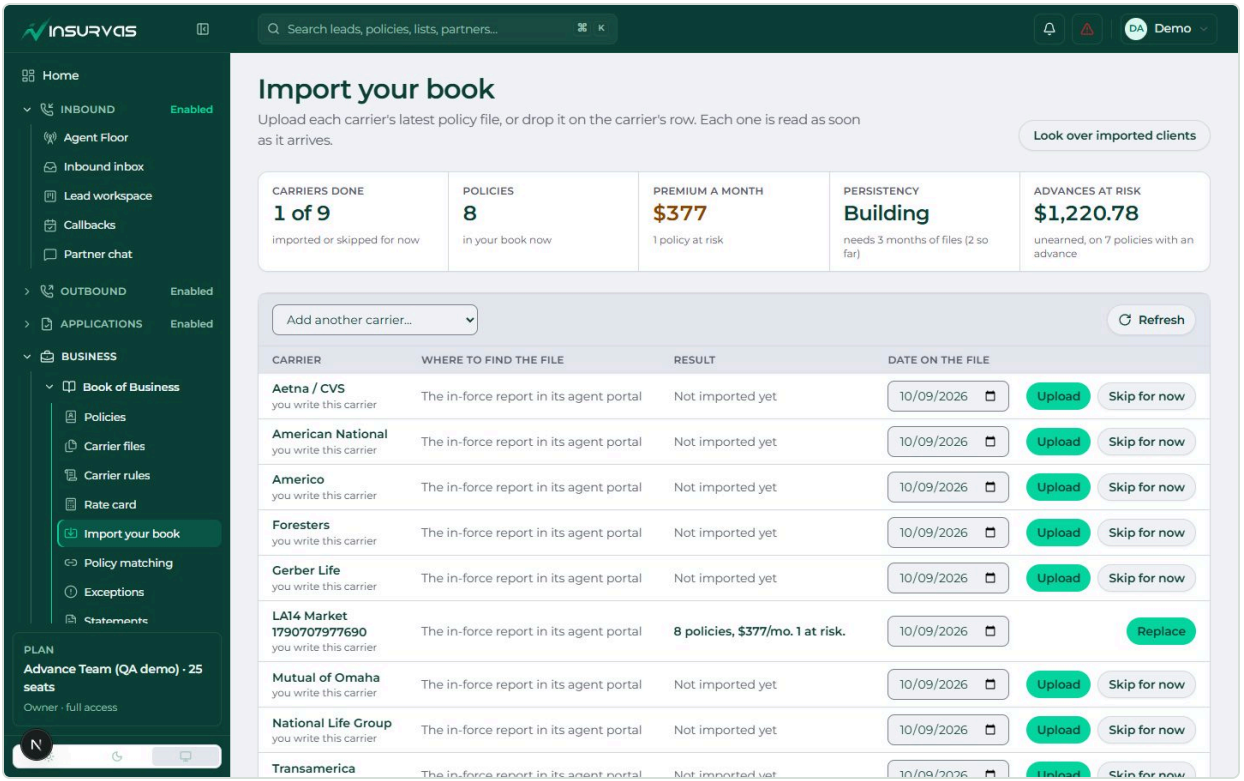

DO

1. Open **Import your book**. Read the tiles.
2. Point at a carrier row: where to find the file in its portal, then **Upload** or **Skip for now**.

YOU'LL SEE

Carriers done	**1 of 9**
Policies	**8**
Premium a month	**$377**
At risk	**1 policy**
Persistency	**Building**
Advances at risk	**$1,220.78**

> *Each carrier says where its file is in the portal. The agency uploads each one once and its whole book is in. Each client is created as provisional until someone checks it.*

Import your book: progress per carrier and the totals.

04 Policies and history

LA-4.6 snapshots · 4.7 current state · 4.11 policy page

`/app/policies?source=carrier`

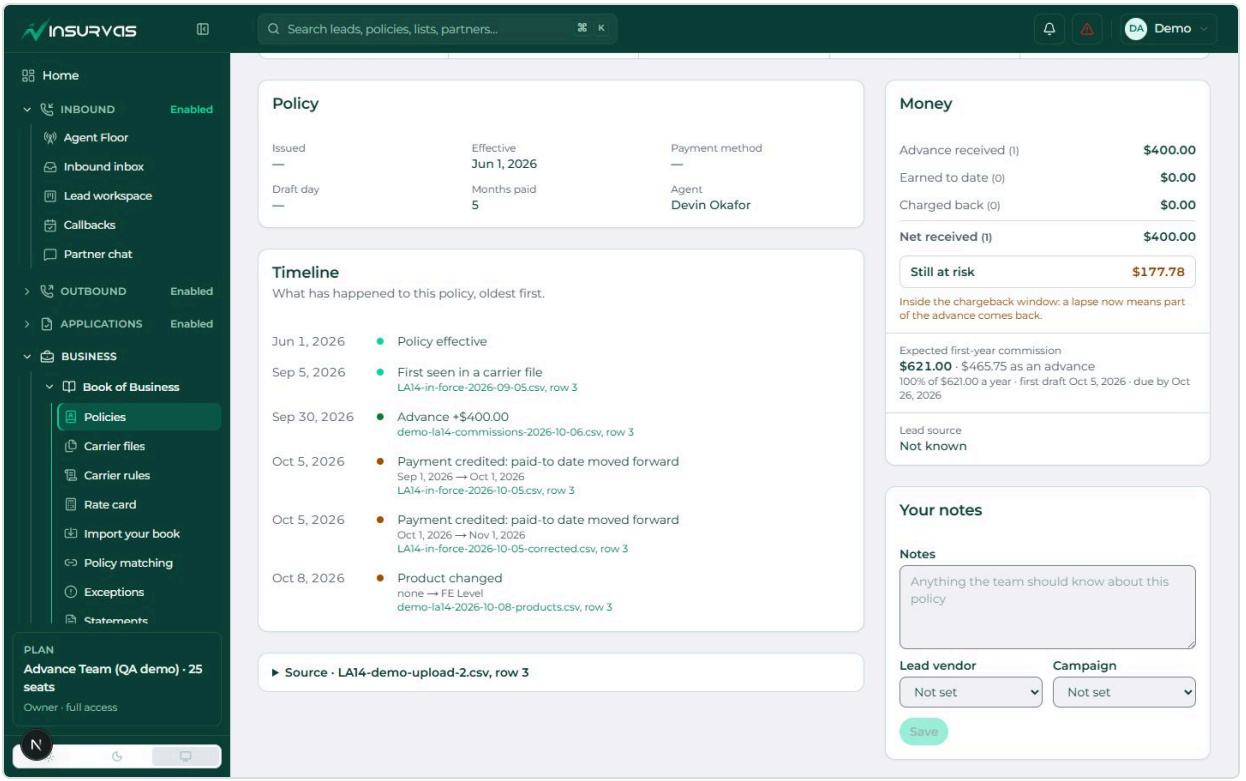

DO

1. Open **Policies** with Source: **From carrier files**. DEMO-1006 reads **At risk · Critical**.
2. Open **DEMO-1002** (Blake Demo): Active, paid to Nov 1, 30 days until the carrier closes it.
3. Scroll to **Timeline**: first seen, the advance, payments, the product.
4. Click **Source · … row 3**: every field names its file and row.

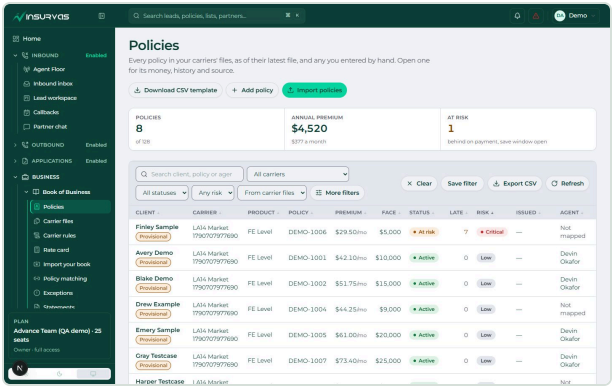

YOU'LL SEE

Policies	**8 (of 128)**
Annual premium	**$4,520**
Advance received	**$400.00**
Still at risk	**$177.78**
Expected first year	**$621.00 · $465.75 advance**

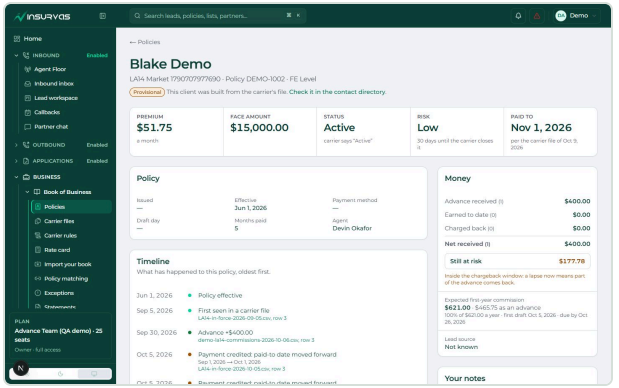

If asked "why two payments on Oct 5?": the carrier sent a file and then a corrected one that day. Both are kept, and the correction shows as a change.

DEMO-1002: the timeline, each line with its file and row, and Money.

Policies, filtered to carrier files.

DEMO-1002: status, risk, paid to.

05 Follow a number down

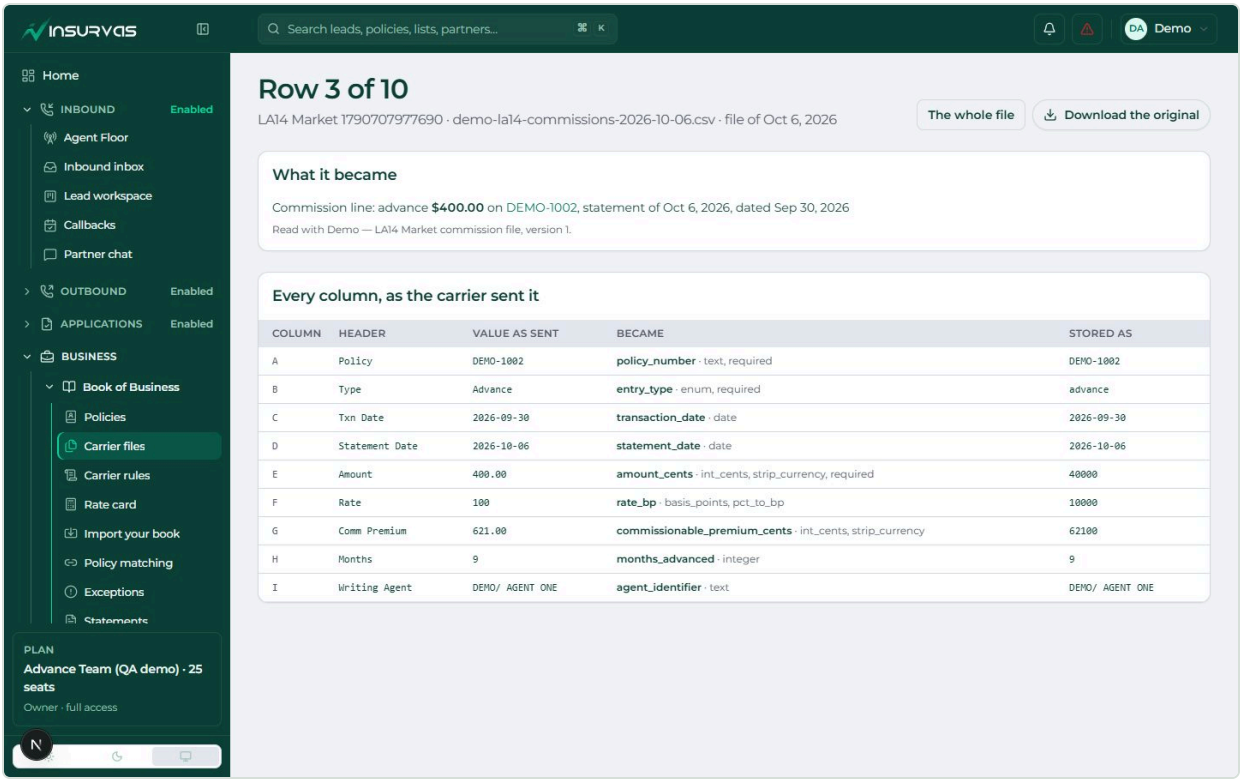

LA-4.20 trace: figure → file → row

`DEMO-1002 › timeline › row 3`

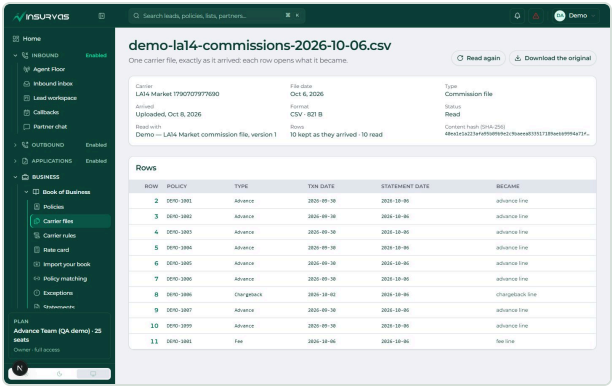

DO

1. On DEMO-1002's timeline, click **demo-la14-commissions-2026-10-06.csv, row 3** on the Sep 30 advance.
2. **Row 3 of 10** opens: "What it became", then every column as sent. "400.00" becomes 40000 cents.
3. Click **The whole file**: all 10 rows.
4. Click **Download the original**: a 60-second link, and the download is logged.
5. Optional: click **Read again**. It re-reads the kept rows and says nothing changed.

> *Every number on every screen can be clicked down to the exact cell of the carrier's file.*

Row 3 of 10: what it became, and every column as the carrier sent it.

The whole file: Read again and Download the original.

06 Commission ledger

LA-4.12 ledger · 4.14 carrier accounts

`/app/ledger?source=carrier`

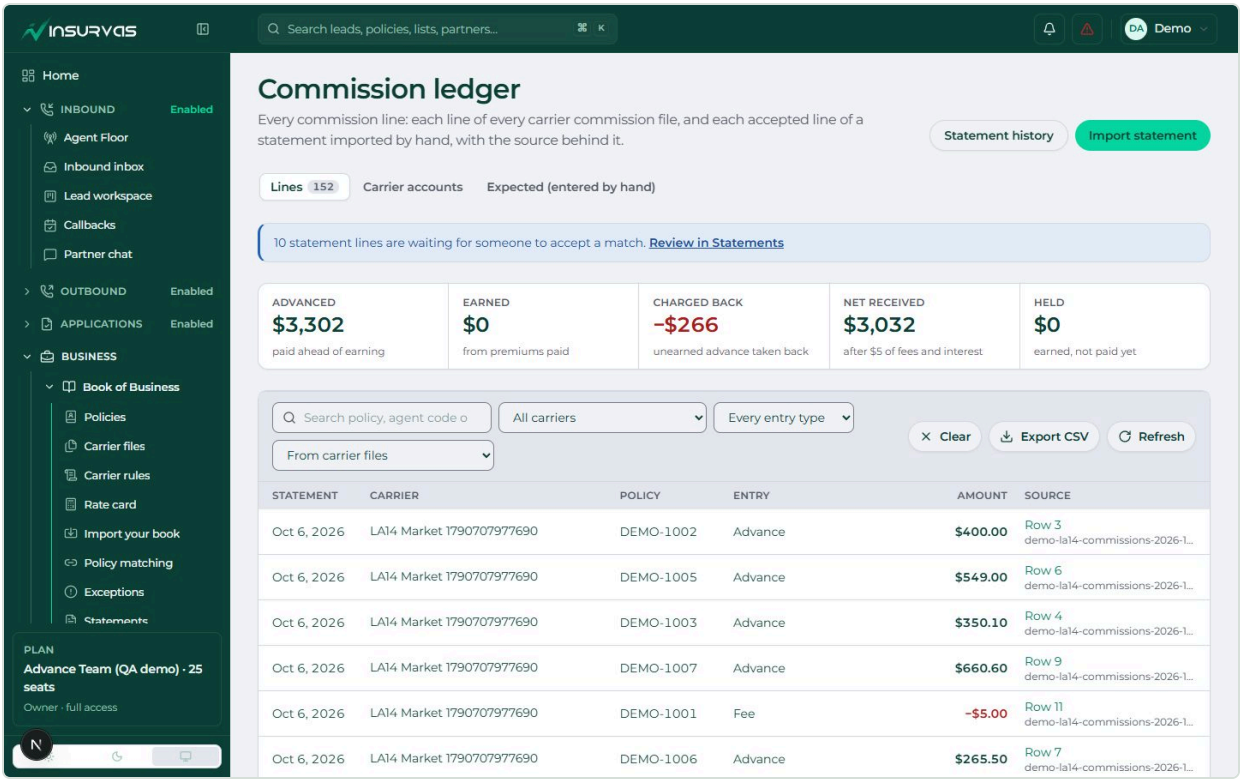

DO

1. Open **Commission ledger** with Source: **From carrier files**. Read the tiles and the 10 lines.
2. Click the **Carrier accounts** tab: the Oct 6 statement **Adds up**.
3. Below it: **Commission for policies not seen yet**.

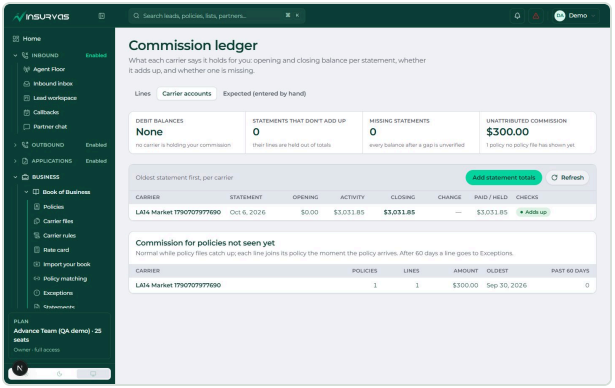

YOU'LL SEE

Advanced	**$3,302**
Charged back	**-$266**
Net received	**$3,032**
Fees and interest	**$5**
Oct 6 statement	**$0.00 → $3,031.85 · Adds up**
Not seen yet	**$300.00 · 1 line**

> *Ledger lines are never edited, only reversed. Each statement is checked to add up. Money for a policy no file has shown yet is kept, and it joins its policy the moment the policy arrives.*

The ledger: the five tiles and every line with its file and row.

Carrier accounts: the statement adds up; $300 for a policy not seen yet.

07 Rate card

LA-4.13 expected commission

`/app/rate-card`

DO

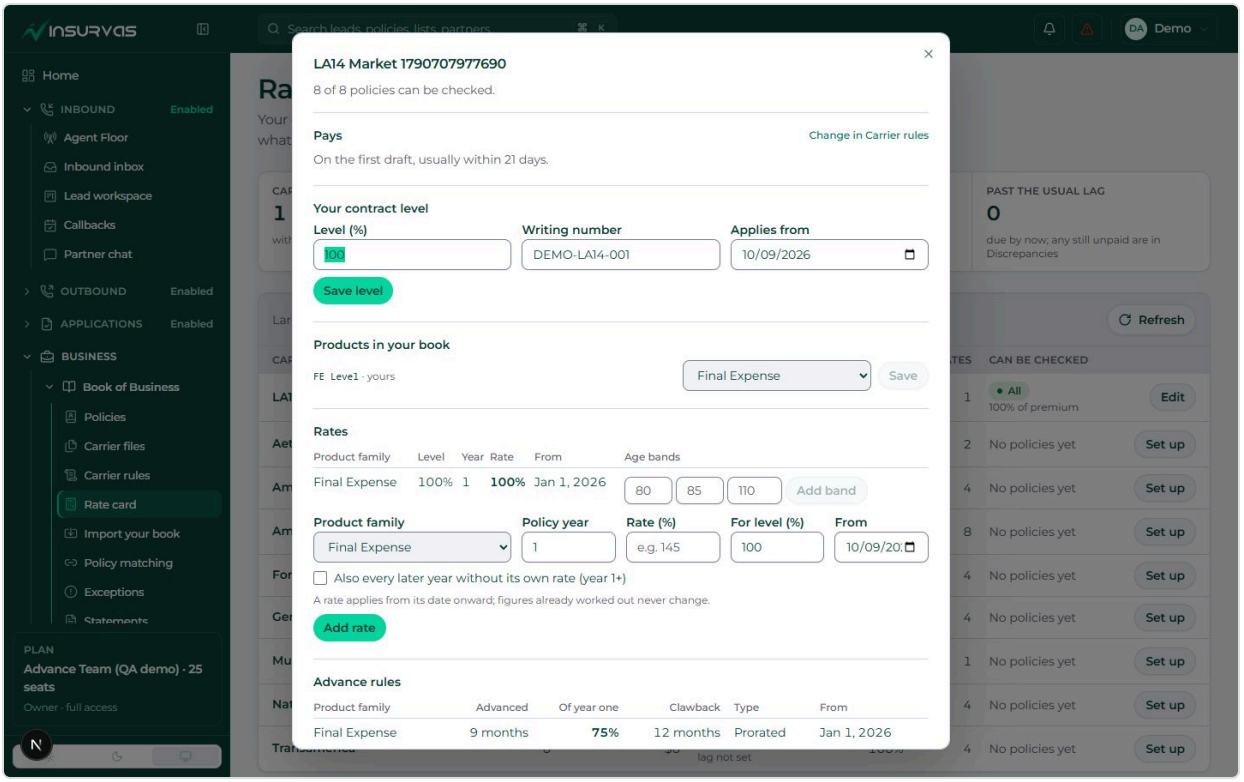

1. Open **Rate card**. Read the tiles.
2. On the LA14 row, click **Edit**.
3. Show: Pays (on the first draft, within 21 days), the contract level, “FE Level” → Final Expense, the rate, and the advance rule (9 months at 75%, a 12-month prorated clawback).
4. Close the panel with the ×.

YOU’LL SEE

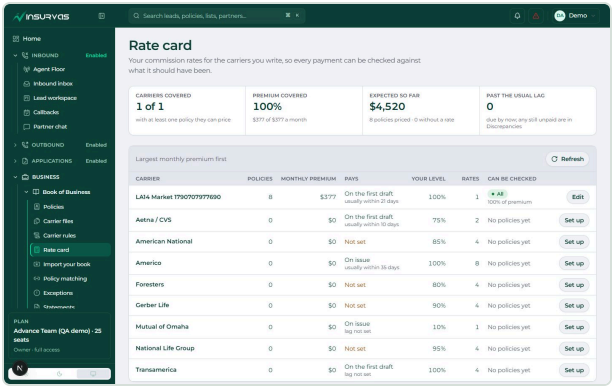

Carriers covered	**1 of 1**
Premium covered	**100% · $377 a month**
Expected so far	**$4,520**
Past the usual lag	**0**

Close without saving. Don’t press Save level, Save or Add rate.

> *Once the agency enters its contract, every payment can be checked against what it should have been.*

Edit on LA14: pays, contract level, product mapping, rates, advance rule.

Rate card: coverage and what is expected.

08 Discrepancies

LA-4.15 discrepancies and the dispute letter

`/app/discrepancies?source=carrier`

DO

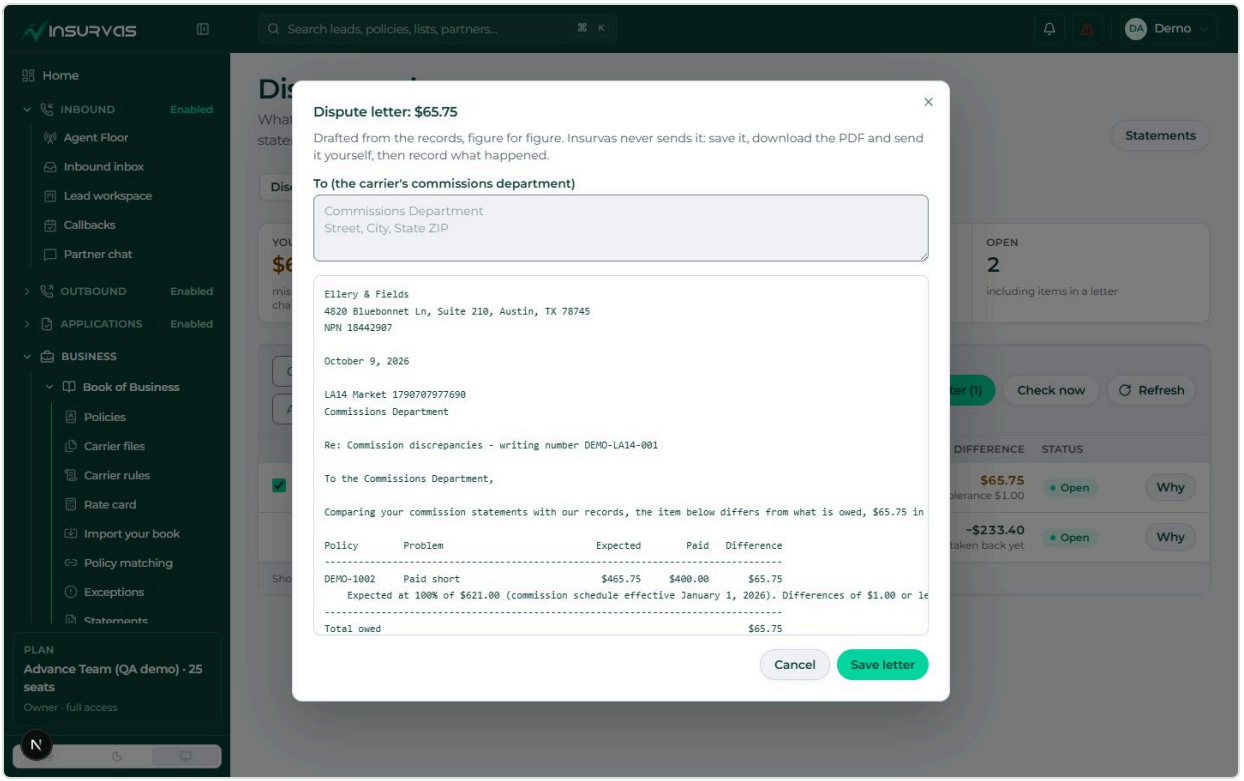

1. Open **Discrepancies** with Source: **From carrier files**.
2. On DEMO-1002 (Paid short), click **Why**: the explanation and its line. Click **Close**.
3. Tick DEMO-1002, then click **Draft letter (1)**: “Dispute letter: $65.75”, drafted figure for figure.
4. Click **Cancel**.

YOU’LL SEE

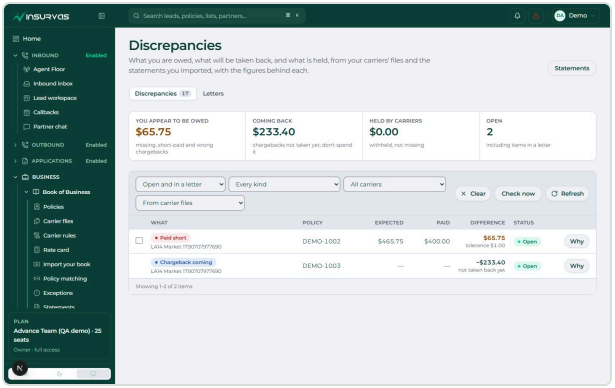

You appear to be owed	**$65.75**
Coming back	**$233.40**
Held by carriers	**$0.00**
DEMO-1002 paid short	**$465.75 expected · $400.00 paid**
DEMO-1003 chargeback coming	**-$233.40**

Click Cancel. Not Save letter.

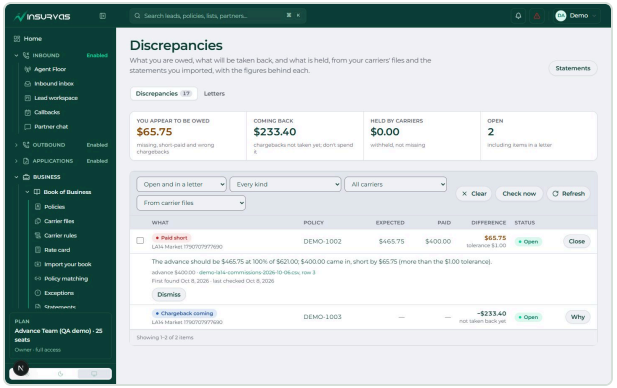

> *Insurvas never sends the letter. The agent saves it, sends it, and records what happened. DEMO-1003 lapsed inside its clawback window, so part of its advance will come back. Don’t spend it.*

Draft letter (1): the dispute letter, drafted from the records.

The two open items, filtered to carrier files.

Why: the explanation and its line.

09 Lapse risk, before the upload

LA-4.16 retention call list

`/app/lapse-risk`

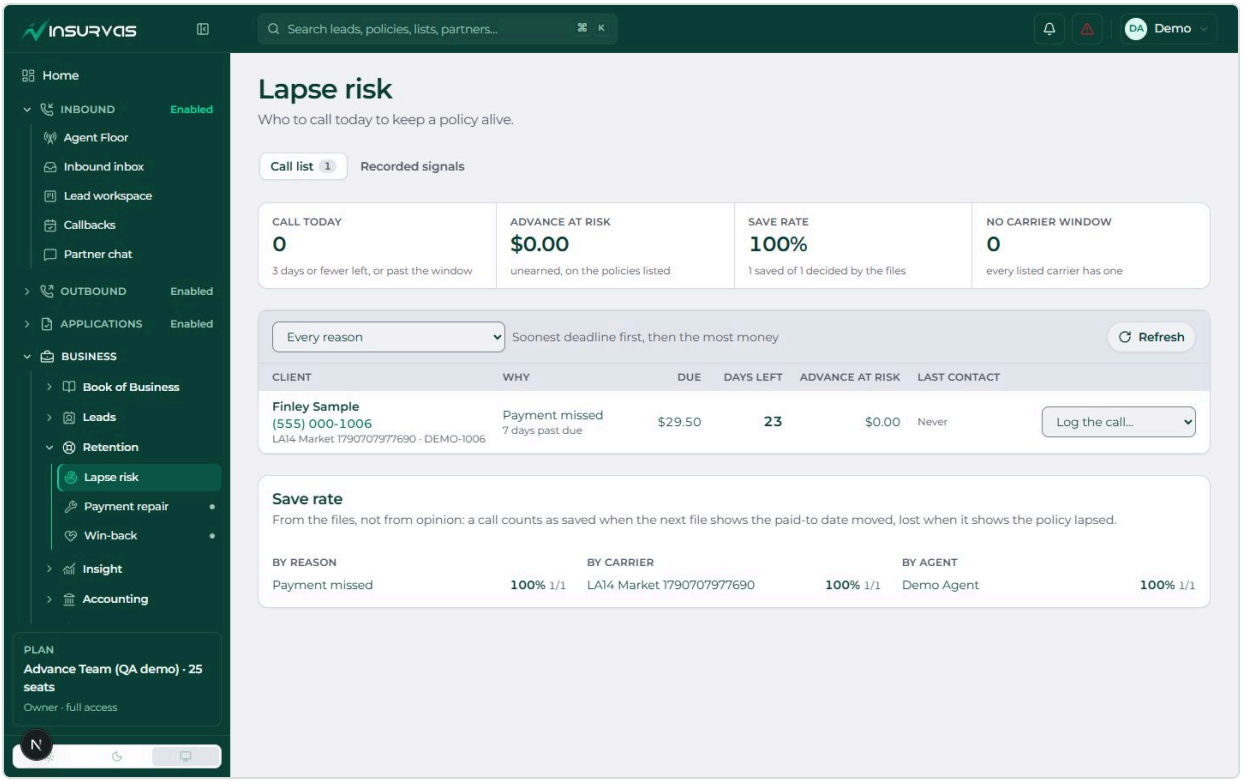

DO

1. Open **Lapse risk**. One client on the call list.
2. Point at DEMO-1006: why, how many days are left, and the call outcomes under **Log the call…**. Don’t log one.

YOU’LL SEE

Call list	**1**
Finley Sample · DEMO-1006	**Payment missed**
Past due	**7 days**
Days left	**23**
Save rate	**100%**

> *Who to call today to keep a policy alive, soonest deadline first. Watch what happens when today’s file arrives.*

The call list before the upload: DEMO-1006, 7 days past due.

10 The live moment

LA-4.1 upload · 4.6 changes · 4.16 call list · 4.19 runs

`/app/carrier-files › Upload a file`

DO, SLOWLY

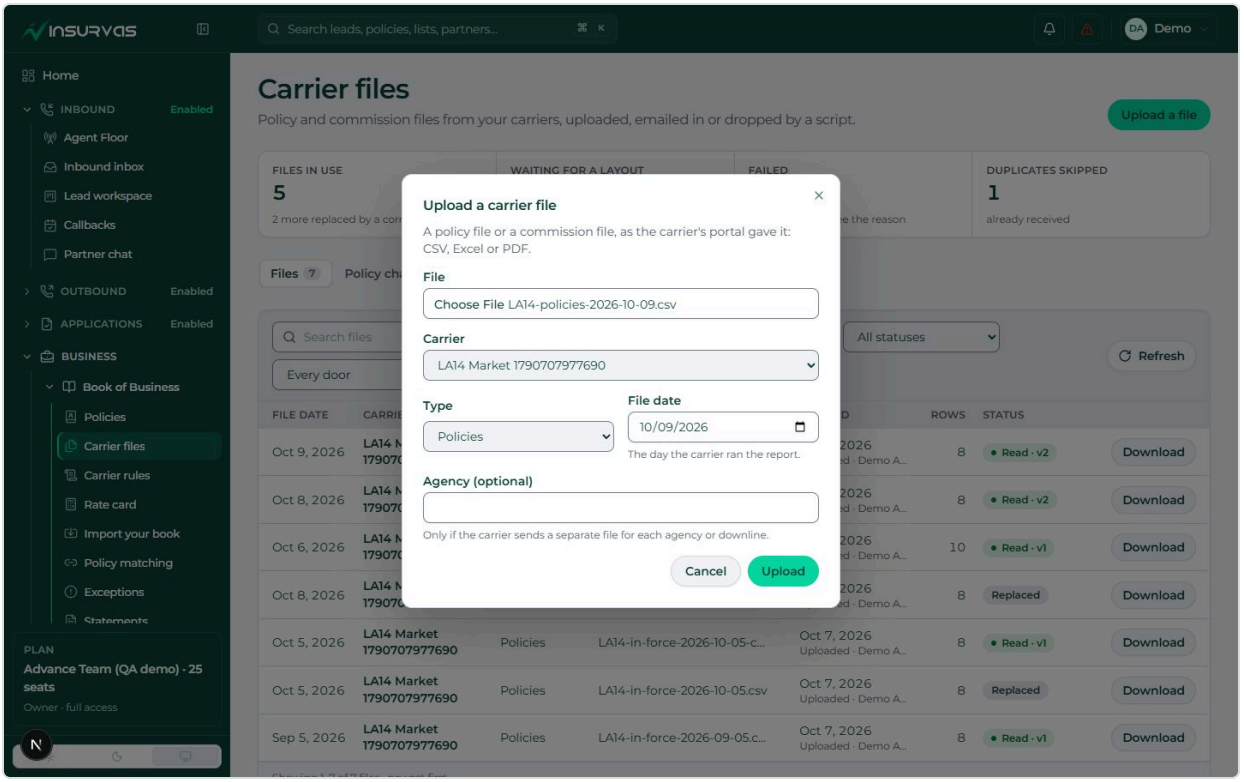

1. On **Carrier files**, click **Upload a file**.
2. Under **File**, choose `LA14-policies-2026-10-09.csv`. **Type** fills in as Policies and **File date** as 10/09/2026.
3. Under **Carrier**, choose **LA14 Market 1790707977690**. This one doesn't fill in by itself. Leave Agency empty.
4. Click **Upload**. The dialog says it replaces the earlier file for that day, which is kept. Click **Done**.

THEN SHOW

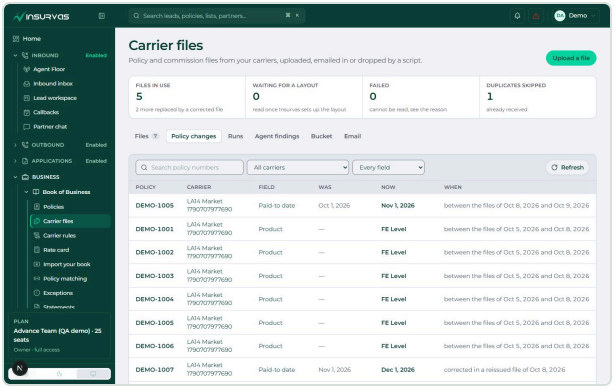

Files	**New file on top, Read**
Runs	**New "Files arrived" run**
Policy changes	**DEMO-1006 paid-to Oct 1 → Nov 1**
Lapse risk (refresh)	**Call list empty**
Import your book (refresh)	**At risk 1 → 0**

> *The carrier's file says DEMO-1006 paid. Within seconds the history records it, and the call list stops asking anyone to chase a client who already paid.*

Optional: upload the same file again. The dialog says "This exact file was already received, so it was not stored again."

The dialog, filled in, just before you click Upload.

Policy changes before the upload. DEMO-1006 will appear at the top.

11 Book scorecards

LA-4.18 scorecards and the daily summary

`/app/book-scorecards`

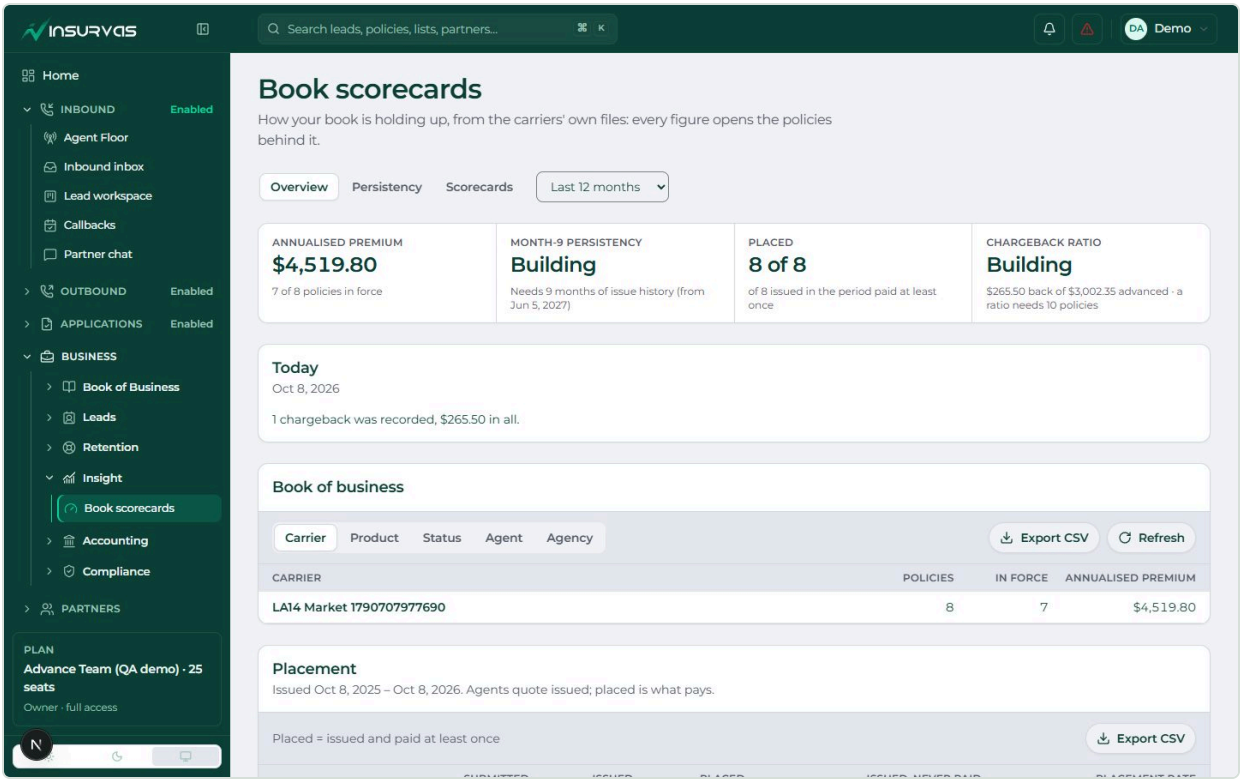

DO

1. Open **Book scorecards**. Read the four tiles.
2. Point at **Today**: the day's summary.
3. Click any figure to open the policies behind it.

YOU'LL SEE

Annualised premium	**$4,519.80**
In force	**7 of 8**
Month-9 persistency	**Building**
Placed	**8 of 8**
Chargeback ratio	**Building**
Today	**1 chargeback, $265.50**

> *Every figure opens its rows. A ratio waits until there are enough policies to mean something. We'd rather say "Building" than show a misleading percentage.*

Book scorecards: the tiles and today's summary.

12 Settings that drive it

LA-4.17 carrier rules · 4.8 matching · 4.9 exceptions

`/app/carrier-rules`

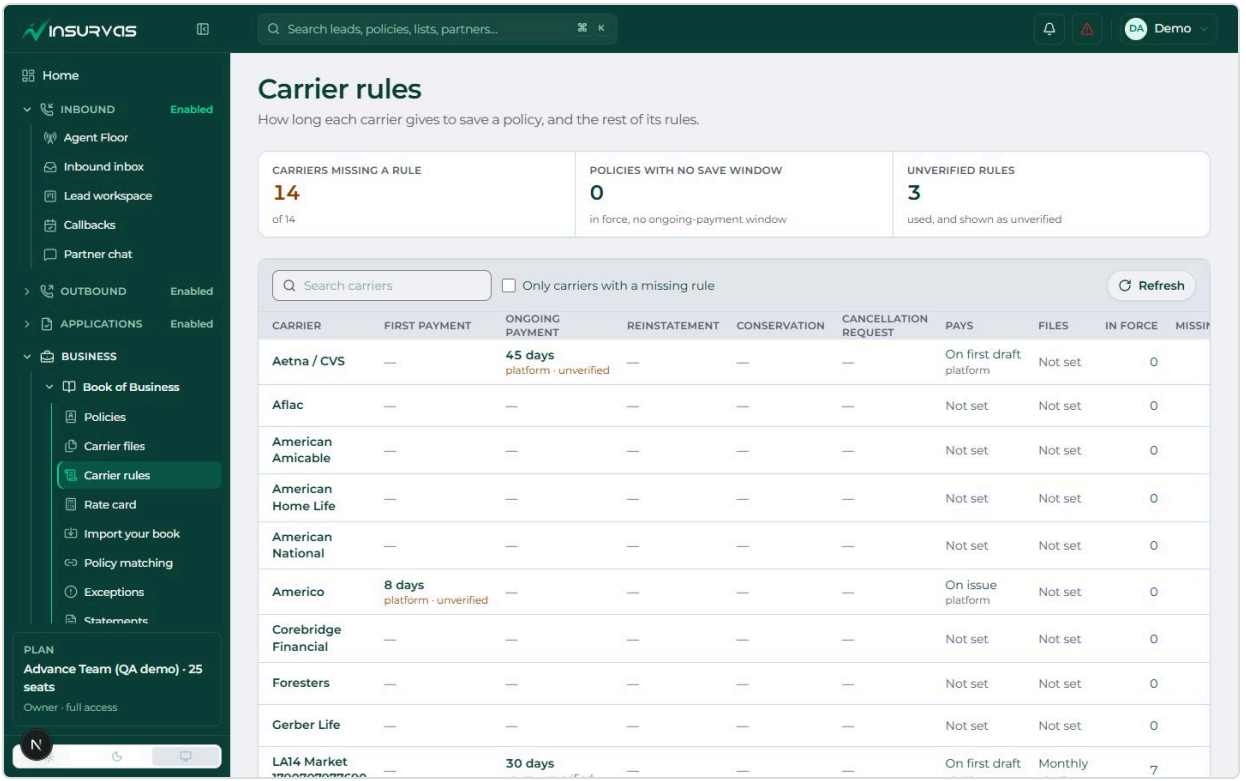

DO

1. Open **Carrier rules**. On LA14: 30 days (yours, unverified), pays on first draft, files monthly.
2. Open **Policy matching**: the tiles, then the **Agent codes** tab.
3. Open **Exceptions**: nothing open.

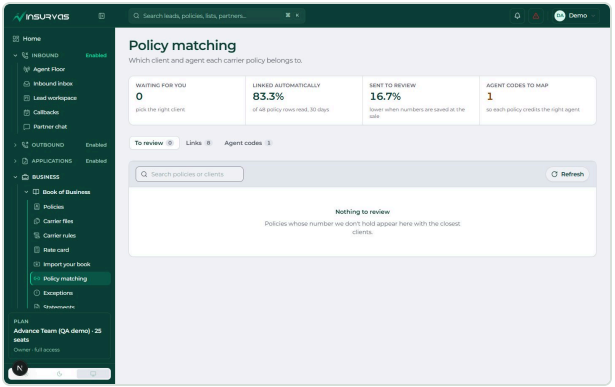

YOU'LL SEE

LA14 save window	**30 days**
Linked automatically	**83.3%**
To review · links · agent codes	**0 · 8 · 1**
Exceptions open	**0 (1 closed in 30 days)**

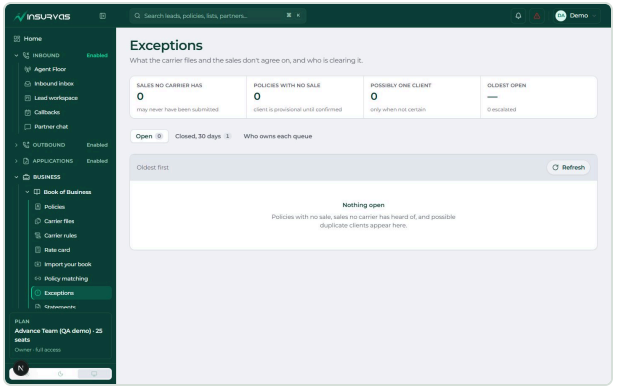

> *How long each carrier gives to save a policy, when it pays and how often its files come drive the countdowns and the missing-file checks. Matching links each policy to a client and an agent. Exceptions catch what the files and the sales don't agree on.*

Carrier rules: each carrier's windows, when it pays, how often its files come.

Policy matching.

Exceptions.

Close, ask, and answer

CLOSE WITH

- **It's tested end to end.** On Oct 9 the whole workflow ran on an empty test agency: 212 checks across all 20 LA-4 tasks. Every policy of 8 carriers matched the answer key. Two bugs were found, fixed and verified live.
- **Nothing is rewritten,** so every number traces back to its file.
- **The money is made up:** a test carrier with eight fictional clients.
- **AI is not switched on yet.** Everything shown works without it.

ASK THEM FOR

- The AI provider, for PDF reading, matching suggestions and written summaries.
- Real carrier files from a few agencies.
- Which carriers come next, beyond the 8 with layouts.
- Production email set-up (Postmark) for the email door.

DON'T

- Upload the file before step 10.
- Press Save in the rate card or letter dialogs.
- Open the Lead vendor or Campaign dropdowns on a policy page. They list old QA test names.
- If a screen fails, use the screenshots in `docs\la4\demo\shots\`.

"Is the money real?"
No. It's a made-up statement for eight fictional clients on a test carrier, built to show one short payment, one chargeback, one unpaid policy and one line for a policy not seen yet.

"Why does persistency say Building?"
It counts only policies issued since the agency's first file. Older policies were only seen because they survived, which would flatter the figure.

"Can the AI write the dispute letter?"
Not yet; it's a template over the records. When a provider is chosen, the AI's wording must pass a check that refuses any figure not in the records.

"How does it know DEMO-1003's advance is coming back?"
The carrier calls the product "FE Level", and the rate card maps it to Final Expense, whose advance rule claws back over 9 months. DEMO-1003 lapsed early, so the unearned $233.40 is expected back.

"What is 'Entered by hand' in the Source filter?"
Policies and statements an agency types in itself, for a carrier that sends no file. On the demo agency it's older test data.

"Where does a number come from?"
Click it. Every figure opens its rows, and every row opens the line of the carrier file it came from.
