A consistent foundation for Insurvas

Design recommendation, paired theme mockups and color QA for management review.

Recommended foundation

shadcn/ui + Radix

Retain the existing component foundation. Adopt one compact visual standard and compose shared page patterns from it.

Inter
400 / 500 / 600

Lucide
One icon family

Semantic tokens
One theme contract

Why this is the most consistent fit

Fits the codebase
Existing shadcn-style components and Radix behaviors.

Plain and professional
Neutral text, opaque surfaces and restrained green.

Reusable across all planes
The same rules for agent, partner and admin screens.

Light mode: deep green + white text

Save changes **4.97:1 label contrast**

Primary #087F63 / label #FFFFFF. Bright brand mint stays available for identity and selected accents.

Dark mode: soft mint + dark text

Save changes **9.11:1 label contrast**

Primary #35D6AA / label #0B2119. Independent dark surfaces preserve depth without neon glare.

What the critique changed

01
Readable button labels
White on brand mint is only 1.89:1.

02
Meaningful status colors
Scheduled = blue; amber = attention.

03
Consistent focus styling
Theme-aware ring, separate from hover.

04
Calmer surfaces
Neutral text; opaque cards; no glow.

Foundations / Light

Color QA / decision record

Specified color pairs are measured with WCAG relative luminance. All values below are exact.

64 / 64 specified pairs pass

Normal text >= 4.5:1. Meaningful control edges and focus indicators >= 3:1.

Key contrast checks

Pair	Light	Dark	Required
Primary button label	4.97:1	9.11:1	4.5:1
Hovered button label	6.86:1	10.50:1	4.5:1
Pressed button label	8.82:1	6.73:1	4.5:1
Body text / surface	16.26:1	15.11:1	4.5:1
Muted text / raised	4.87:1	6.44:1	4.5:1
Link text / raised	5.59:1	9.11:1	4.5:1
Control edge / raised	3.30:1	3.71:1	3:1
Focus ring / raised	4.46:1	7.91:1	3:1

Standardize by meaning

Primary action

Deep green / light; soft mint / dark.

Secondary action

Neutral label and visible outline.

Information vs warning

Blue = scheduled. Amber = attention.

Disabled controls

Explicit muted tokens, not global opacity.

Review scope & next checks

Verified here: all specified text, primary-state, status, focus and control-edge color pairs; embedded Inter typography; PDF layout and exported mockups.

Implementation QA still required: actual rendered styles, keyboard navigation, screen-reader names, zoom, responsive layouts, touch targets and system theme switching. Static mockups do not prove full WCAG conformance.

Sources & decision requested

Select the theme direction and shared component rules.

- shadcn/ui - semantic theming
- Radix - accessibility responsibilities
- Inter - text designs & tabular figures
- W3C - text contrast
- W3C - meaningful UI contrast
